

Poster No.	Title	Authors
P1	Investigating of Machining Performance in Terms of Tool Wear and Hole Accuracy in Drilling of Particleboard Surfaced with Synthetic Resin Sheet	<i>Sait Dunder Sofuoglu , Alaattin Kakal (Dumlupinar University)</i>
P2	Patterns of Knife Edge Recession in an Industrial Chipper-Canter	<i>Shyamal Ghosh , Roger Hernández , Carl Blais (Laval University)</i>
P3	Cutting Performance and Wear Characteristics of Chromium Nitride-Coated Tools Specification of a Cutting Tool, and the Edge Wear and Machined Surface Quality in Flat-grain V-groove Milling of Sugi	<i>Atsushi Tsuchiya (Kanefusa Corporation) , Yoshio Tsujino (Research Institute of Environment Agriculture and Fisheries Osaka Prefectural Government) , Shuichi Kawai (Kyoto University)</i>
P4	Effects of Cutting Parameters on Cutting Forces and Surface Quality of Black Spruce and Balsam Fir Cants	<i>Svetka Kuljich , Angela Llavé , Roger Hernández (Laval University) , Ahmed Koubaa (University of Québec)</i>
P5	Effects of Temperature and Moisture Content on Wood Mechanical Properties Associated to the Chipping Process	<i>Roger Hernández , Leandro Passarini (Laval University) , Ahmed Koubaa (University of Québec)</i>
P6	Evaluation of Thermal Influence on Tool and Wood Affected by High Speed Friction	<i>Ryuichi Iida , Tadashi Ohtani (Tokyo Gakugei University)</i>
P7	Measurement of Strain During Slow-Speed Orthogonal Cutting of Wood Using a Digital Image Correlation Method	<i>Yosuke Matsuda , Yuko Fujiwara , Koji Murata , Shogo Okumura (Kyoto University)</i>
P8	A Review of Mozambican Wood Exploitation -Map of the Processing Chain	<i>Pedro Ah Shenga , Luís Cristóvão , Olof Broman (Luleå University of Technology)</i>
P9	Basic Studies on Laser Cutting of Wood and Wood-Based Materials	<i>Kazuaki Watanabe , Takeshi Ohuchi (Fukuoka University of Education)</i>
P10	State of Lumber Manufacturing Industry in Japan	<i>Kohji Murata , Yuji Ikami , Yukari Matsumura (Forestry and Forest Products Research Institute)</i>

P11	Application of a Non-Linear Rheological Method for the Compaction of Wood-Based Materials	<i>Mihály Varga , Zoltán Kocsis (University of West Hungary)</i>
P12	General Regularities of the Surface Roughness Sanding Solid Woods	<i>Endre Magoss (University of West Hungary)</i>
P13	Veneer Lathe Aiming for High Yield and High Quality Veneer Cutting of Tapering Small Diameter Softwood Logs	<i>Takao Momoi , Hiroya Ohbayashi , Yongzhe Yan , Miho Toyoda , Toshiro Tochigi , Jun Kobayashi (Tokyo University of Agriculture)</i>
P14	Effect of Moisture Content when Manufacturing Wooden Veneer Trays	<i>Yoshitaka Kubojima , Yutaka Kataoka (Forestry and Forest Products Research Institute), Yutaka Shonai (Shonai Machinery Co., Ltd.), Kiyohiko Fujimoto, Kohji Murata, Makoto Kiguchi, Tsutomu Takano, Yasunori Hatano (Forestry and Forest Products Research Institute)</i>
P15	V-Grooving Machine: An Apparatus to Convert Cylinder Shaped Bamboo Culms into Flat Sheets for Laminated Bamboo Timber Production	<i>Edi Suhaimi Bakar , Zaidon Ashaari , Mohd. Zin Jusoh , Mohd. Dzafarin Sahrani (University Putra Malaysia)</i>
P16	Influence of Parameters of Pressing on Geometrical Stability of Fronts Veneered with Zebrano ( <i>Microberlinia bisulcata</i> A. Chev.) and American Cherry ( <i>Prunus serotina</i> Ehrh.)	<i>Sylvia Oleńska , Robert Makuch , Piotr Beer (Warsaw University of Life Sciences)</i>
P17	Influence of Cutting Direction and Moisture Content on the Cutting Forces During Bandsawing	<i>Payam Moradpour (University of Tehran), Frieder Scholz (FH-Rosenheim), Kazem Doosthoseini, Asghar Tarmian (University of Tehran)</i>
P18	Reduction of Airborne Dust Generated from Circular Sawing by Providing Water to Work Pieces	<i>Kiyohiko Fujimoto , Tsutomu Takano (Forestry and Forest Products Research Institute), Shogo Okumura (Kyoto University)</i>
P19	Work Analysis on Large-Diameter Sugi Log Sawing System	<i>Yuji Ikami , Yukari Matsumura , Kohji Murata (Forestry and Forest Products Research Institute), Motoo Dohi , Kuniaki Furukawa (Gifu Prefectural Research Institute for Forests)</i>
P20	Quality of Flat-Square Lumber without Pith Sawn from Large-Diameter Sugi ( <i>Cryptomeria Japonica</i> ) Logs.	<i>Yukari Matsumura , Yuji Ikami , Kohji Murata (Forestry and Forest Products Research Institute)</i>
P21	Additional Heat Treatment to Improve Hardwood Quality for Machining	<i>Saly Takeshita , Ivaldo Pontes Jankowsky (University of São Paulo)</i>

P22	Dimensional Stability, Machining and Finishing Characteristic of 15-Years-Old Teakwood Impregnated with PEG-1000 in Various Concentrations	<i>Tomy Listyanto</i> , <i>Muhammad Navis Rofii</i> (Gadjah Mada University) , <i>Keisuke Ando</i> , <i>Nobuaki Hattori</i> (Tokyo University of Agriculture and Technology)
P23	Impact of Twist Near the Ends of Planed Timber	<i>Ann Axelsson</i> (Luleå University of Technology)
P24	Experimentally and Statically Evaluating of Drilling of Massive Wooden Table which is Made of Scotch Pine ( <i>Pinus Sylvestris</i> L.)	<i>Alaattin Kacal</i> , <i>Sait Dundar Sofuoglu</i> (Dumlupinar University)
P25	Investigation of the Working Accuracy of a CNC Router	<i>Péter Kovács</i> , <i>Endre Magoss</i> (University of West Hungary)
P26	Tapping of Wood with a Drill Tap for Bolt Connection	<i>Takeshi Ohuchi</i> , <i>Hiroki Haraoka</i> , <i>Ryo Taniike</i> (Fukuoka University of Education)
P27	Velocity Field Analysis of Flying Particles at Wood Machining Using a New Measurement Method	<i>Etele Csanády</i> , <i>György Sitkei</i> , <i>Imre Bakki-Nagy</i> , <i>Szabolcs Nemeth</i> , <i>Lajos Reisz</i> (University of West Hungary)
P28	Optimization of Drying Condition for Boxed-Heart Timber by Two Displacement Meters	<i>Isao Kobayashi</i> (Forestry and Forest Products Research Institute) , <i>Naohiro Kuroda</i> (Wood Technological Association of Japan)
P29	Development and Performance of the Dehumidification Drying Kiln System with CO <sub>2</sub> Refrigerant (R-744) Heat Pump Equipment	<i>Shuetsu Saito</i> , <i>Yukari Matsumura</i> (Forestry and Forest Products Research Institute) , <i>Akito Machida</i> , <i>Masashi Kato</i> (Mayekawa MFG Co., Ltd.)
P30	Evaluating Drying Stress Development on Lumber Surface Using Near Infrared Spectroscopy Combined with Artificial Neural Networks	<i>Ken Watanabe</i> , <i>Isao Kobayashi</i> (Forestry and Forest Products Research Institute) , <i>Yasuhiro Matsushita</i> (SET Software Co., Ltd.) , <i>Shuetsu Saito</i> (Forestry and Forest Products Research Institute) , <i>Naohiro Kuroda</i> (Wood Technological Association of Japan) , <i>Shuichi Noshiro</i> (Forestry and Forest Products Research Institute)
P31	Influence of High Temperature Air-Steam Mixture Application of Time Wood Drying Process	<i>Jacek Baranski</i> , <i>Maciej Wierzbowski</i> (Gdansk University of Technology)
P32	Development of a Log-House-Type Lumber Dryer using Solar Energy	<i>Norihiko Yamada</i> , <i>Tomoyuki Ishizaka</i> (Hyogo Pref. Tech. Center for Agriculture, Forestry and Fisheries) , <i>Yoshihisa Fujii</i> , <i>Shogo Okumura</i> (Kyoto University)
P33	Effect of Wood Properties on Drying Defects of Sugi Boxed-Heart Square Timber	<i>Kana Yamashita</i> , <i>Shuetsu Saito</i> (Forestry and Forest Products Research Institute)
