Catalogue of T. Mishima's Collection - Bird Skins -

KAWAJI Noritomo^{1)*}, TOJO Hitoshi¹⁾ and KITAHARA Eiji¹⁾

Abstract

Five thousand and ninety bird skins were donated to Forestry and Forest Research Institute by Toji Mishima. They were collected between 1884 and 2001, and many rare and endangered species are included. We listed the bird skins here in order to promote the scientific surveys using these specimens. All the specimens are listed in groups of species.

Key words: Toji Mishima, 5,090 bird skins, list of donated specimens

Introduction

On November 9, 2001, Toji Mishima donated a large number of bird specimens to the Forestry and Forest Products Research Institute (FFPRI). T. Mishima worked for the Government Forest Experiment Station, the predecessor of FFPRI, from 1950 to 1978. He published many scientific papers, especially on taxonomy of subspecies. He described a subspecies, *iwasakii*, of the Japanese sparrowhawk, *Accipiter gularis* in 1962 (Mishima, 1962). The donated specimens consist of stuffed birds, skins, and eggs, and include many endangered species such as the Japanese Crested Ibis *Nipponia nippon*, Japanese Marsh Warbler *Locustella pryeri* collected from Tokyo, Japanese Wood Pigeon *Columba janthina* from Kita Iwo I. The recent advances in biodiversity studies have led to greater demand for museum specimens. To promote the scientific use of these specimens, we have prepared a list of 5,090 bird skins, which constitute the majority of the specimens and are in greatest demand for scientific surveys.

The list consists of order, family, species, English

name, Japanese name, specimen number, sex, age, locality and collector's name. Each specimen has the original label with varying degrees of detailed information. Because the specimens were described in accordance with the classification system in place when T. Mishima collected them, some of the scientific names have changed over the years. In this list, we revised the scientific names of the birds in Japan referring to OSJ (2000). For those species that were not included in OSJ (2000), the scientific names, English and Japanese names were revised referring to Yamashina (1986) and del Hoyo et al. (1992, 1994, 1996, 1997, 1999, 2001, 2002). Although some of the region names have changed, we did not change the locality names on the labels and the list but translated the names into English. Some of the specimens had been purchased from traders or came from caged birds. We denoted such specimens with (P) after the locality. The species are arranged based upon OSJ (2000), Peters' checklists of birds of the world (I-XV, 1934-1986), and Vaurie (1959, 1965). All the specimens are listed in groups of species.

三島コレクション標本目録 - 仮剥製鳥類標本 -

川路 則友¹⁾*・東條 一史¹⁾・北原 英治¹⁾

要 旨

旧農林水産省林業試験場に1950年から1978年にかけて勤務されていた三島冬嗣氏から、森林総合研究所に数千点に及ぶ仮剥製鳥類標本の寄贈を受けた。標本は、1884年から2001年にかけて収集されたものであり、絶滅危惧種も多く含まれ、現在では入手困難なものが数多い。今回、仮剥製鳥類標本5,090点についてリストを作成、公表し、後進の研究に供与することとした。リストは、種の単位で配列した。

キーワード：三島冬嗣氏、仮剥製鳥類標本、寄贈標本リスト、5,090点
